

# Let's Keep Seattle MOVING

*At the Crossroads*

# Cost of Inaction

## > We are at a critical juncture.

Many of Seattle's key pieces of infrastructure are reaching the end of their useful lives. If we do not continue to reinvest in the system, wear and tear will continue to weaken many of our most important transportation structures. We will spend more time on the road and the movement of goods and services will be delayed. The longer we wait to act, the more it will cost us both in dollars and in time.
